

New Harness & Lighting System
for large trucks and trailers

Original Harness & Lighting System
for box, tandem and boat trailers

New for 2017 - LED Autolamps Unique

Functional, Long Lasting Quality, Value for Money

Innovated Harness System

The key to this system is its flexibility by offering every conceivable option for various lighting functions to be added at any point in the truck harness line.

Flexibility

Cable lengths from 0.25m to 15m combining heavy duty connector covers for every plug and connector assembly point with a breaking strain in excess of 25kg, making this a heavy duty robust truck harness assembly.

Colour Coded

All assembly plugs are colour coded to its specific function. Example - The Brown plug is for Marker Lamps. When requiring a marker lamp, add a brown plug in the harness line, add the desired length 2 core cable and plug into the desired marker lamp. The Yellow (LHS) or Green (RHS) plug is for Side Direction Indicator Lamps. When requiring a Side Direction Indicator lamp, add a yellow or green plug whether left or right hand side in the harness line, add the desired length 2 core cable and plug into the desired Side Direction Indicator lamp.

- Add any Light Anywhere in the Harness System
- Heavy Duty Water Proof Cable, Plugs and Connectors
- Colour Coded Plugs to the colour of the wire function
- All Lights Compliant with ECE or ADR
- Cable System Compliant with Dangerous Goods (AS2809)
- 5 Year Warranty, Livestock Transport 1 Year Warranty
- RoHS Compliant Cables, Plugs and Lights

Heavy Duty Harness System

Cable and Wire

TWP Cable (Thin wall thermo plastic) and PVC Automotive primary wire complying with SA-J1128, Annealed copper wire in compliance with ASTM B3, RoHS compliant Lead free copper wire with operating temperature between -40°C to +85°C - Harness system tested to B Double requirements when LEDs are used. Please refer to wire gauge table for further information regarding wire gauge and amperage.

DG Rating

Cables and covers are manufactured to comply with DG (Dangerous Goods) Rating. Inspected by worksafe Victoria and is accordance with DG-150424-1, DG-150424-2 in relation to the electrical wiring requirements as it applies to dangerous goods road vehicle bulk tankers, in accordance for usage with petrol and gas tankers. Cabling and lighting complies with AS2809 parts 1 & 2.

Labour Costs

Designed specifically to be easily and quickly installed without the need to cut, splice, solder, join or tape wire joins, reduces fitting times with its simple plug in design allowing skilled or non-skilled fitters to complete the install. Expect to reduce lighting assembly labour costs by up to 75%.

Warranty

Five Year Warranty for all truck and trailer vehicles and a one year warranty for livestock carrying trailers.

Heavy Duty Truck & Trailer Harness and Lighting System

7 Core Main Cable Specifications

The cable we have chosen for this harness system is used widely in the automotive industry and complies with SA-J1128 Standards.

The plugs we have designed are 100% water proof and pass IP68 Standards, our unique double ridged male plugs ensure complete water proofing by doubling the protection from water ingress.

Plugs have been designed with a special water proof double sealing lip which will not allow water ingress

Cable Width 9.5mm, Male & Female plug Diameter 18mm Combined length of plugs when joined 106mm

The cover for the plugs have been created for extra strength and engineered to a breaking strain of 25 kg.

Part No. CMC, Cable Cover Dimensions, Diameter 22mm, Length 110mm

Heavy Duty Truck & Trailer Harness and Lighting System

Cable Lengths with Male Plug and Bare Wires, use from the front of trailer

Part No

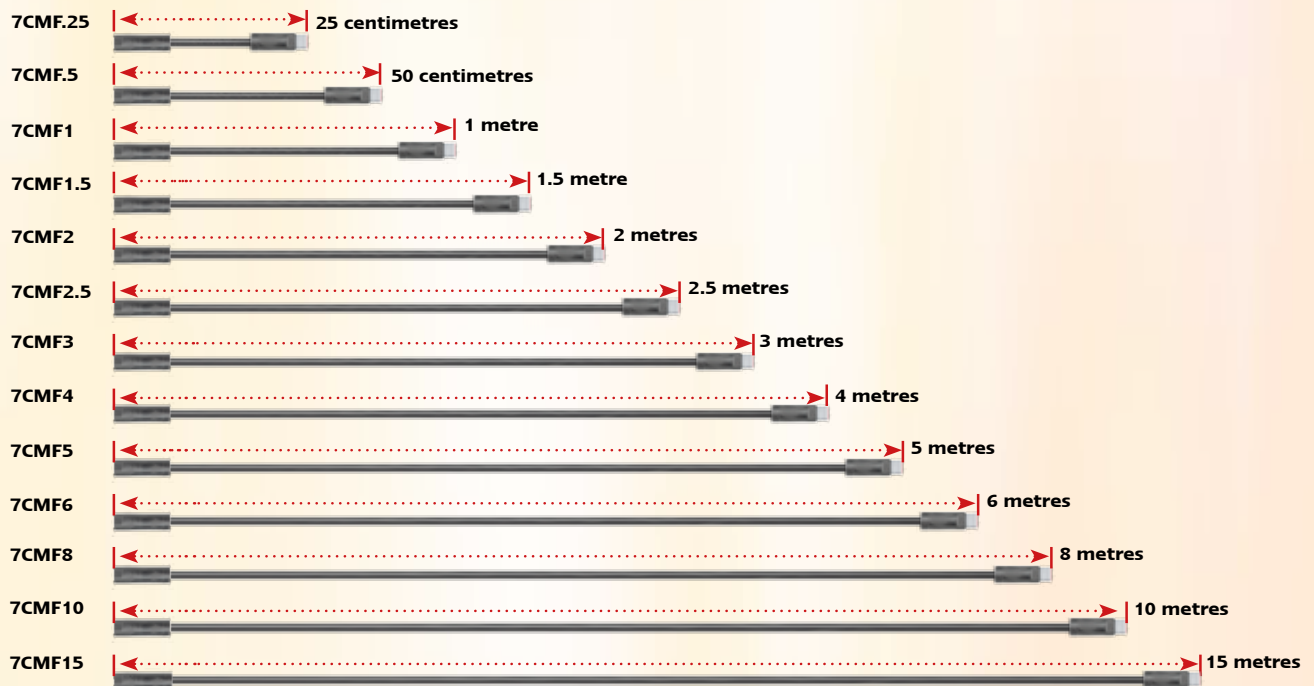

Cable Length with Female Plug and Bare Wires, when using other brand rear lamps

Cable Lengths with Male and Female Plugs, use when adding lighting function plugs

Heavy Duty Truck & Trailer Harness and Lighting System

7 Core Cable Splitter

The 7 Core cable splitter has many functions, it can be used to add another rear combination lamp to an existing rear combination lamp it is basically a 7 Core cable split into two 7 core cables giving you the ability to continue the harness cable in any manner you desire before terminating with a final rear combination lamp assembly. Example on opposite page.

Part No. 7P3W Plug Dimensions
Width 94mm, Length 44mm

Part No. 7PC Cover Dimension
Width 194mm, Length 60mm

7 Core Rear Junction Splitter

The rear junction splitter has been designed to split the 7 core cable into a left and right side for rear lighting functions of Stop/Tail, Indicator and Reverse. The rear junction splitter also has a left and right side 2 pin plugs for the connection of licence plate lamps and marker lamps. Example on opposite page.

Part No. 7CJ Plug Dimension
Width 89mm, Length 61mm

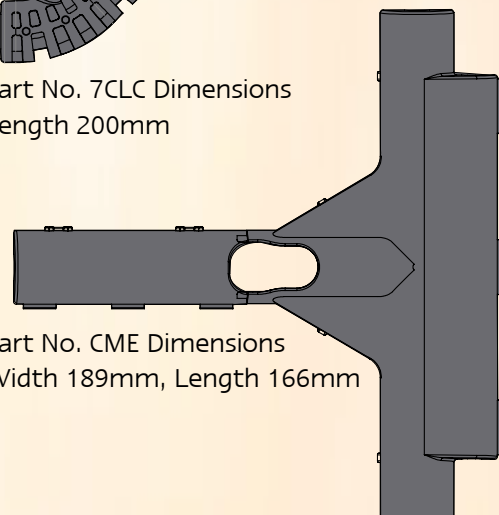

Part No. CCJ Plug Cover Dimension
Width 189mm, Length 116mm

7 Core Rear Junction Extension

Part No. 7CLC Dimensions
Length 200mm

The 7 Core Rear Junction Splitter Extension is used with the 7 core rear junction splitter (Above) for the purpose of connecting a 7 pin trailer base at the rear of the trailer, its purpose is for the ability to connect another trailer to the existing harness system (B-Double). Example on opposite page.

Part No. CME Dimensions
Width 189mm, Length 166mm

Heavy Duty Truck & Trailer Harness and Lighting System

7P3W

7 Core cable and plug to rear combination lamps

7P3W

7 Core cable from the front of the vehicle or from the 7CJ Main cable splitter

7 Core cable and plug to rear combination lamps

7CJ

2 Core cable and plug to licence plate lamps and marker lamps

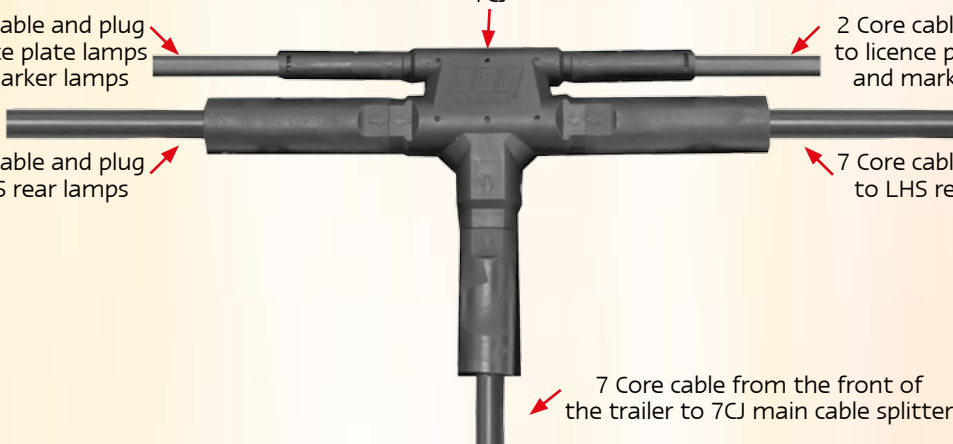

7CJ

2 Core cable and plug to licence plate lamps and marker lamps

7 Core cable and plug to RHS rear lamps

7 Core cable and plug to LHS rear lamps

7 Core cable from the front of the trailer to 7CJ main cable splitter

7CLC

7 Core extension to trailer base To be used when second trailer is required

2 Core cable and plug to licence plate lamps and marker lamps

7CJ

2 Core cable and plug to licence plate lamps and marker lamps

7 Core cable and plug to RHS rear lamps

7 Core cable and plug to LHS rear lamps

7CLC

7 Core cable from the front of the trailer to 7CJ main cable splitter

Heavy Duty Truck & Trailer Harness and Lighting System

Left & Right Indicator Lamp Splitter

Defined by its Yellow colour the 7CMI is a splitter from the 7 Core cable that power both the left and right hand side indicator lamps, the 7CMI has dual splitters at right angle to the 7 Core cable.

Part No. 7CMI Plug Dimension
Width 60mm, Length 78mm

Part No. CMA Cover Dimension
Width 130mm, Length 177mm

Indicator Lamp Splitters

The 7CIL is a single splitter and runs parallel with the 7 Core cable and is used for left hand indicator. The 7CIR is a single splitter and runs parallel with the 7 Core cable and is used for right hand indicator.

Part No. 7CIL Plug Dimension
Width 37mm, Length 78mm

Part No. 7CIR Plug Dimension
Width 37mm, Length 78mm

Part No. CMB Cover Dimension
Width 44mm, Length 177mm

Accessory Plug Individual Lamps

Part No. 2PFI
For use when using
recessed indicator lamps

Heavy Duty Truck & Trailer Harness and Lighting System

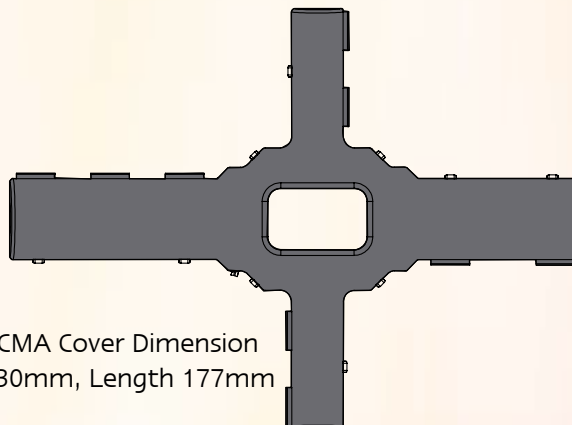

Dual Marker Lamp Splitter

Defined by its brown colour the 7CMF is a splitter from the 7 Core cable that powers the marker lamps, the 7CMF has dual splitters at right angle to the 7 Core cable.

Part No. 7CMF Plug Dimension
Width 60mm, Length 78mm

Part No. CMA Cover Dimension
Width 130mm, Length 177mm

Marker Lamp Splitter

The 7CF plug is a splitter that runs parallel with the 7 Core cable and powers the marker lamps.

Part No. 7CF Plug Dimension
Width 37mm, Length 78mm

Part No. CMB Cover Dimension
Width 44mm, Length 177mm

2 Core Splitter Plug

The 2P3W is a plug that splits the marker cable into two, this allows the fitter to add as many marker lamps as required, always align the arrows on the plugs to ensure the correct connection.

Part No. 2P3W
To be used when more than one
Marker lamp is required.

Part No. 2P3C
Cover for the 2P3W.
Width 35mm Length 126mm

Heavy Duty Truck & Trailer Harness and Lighting System

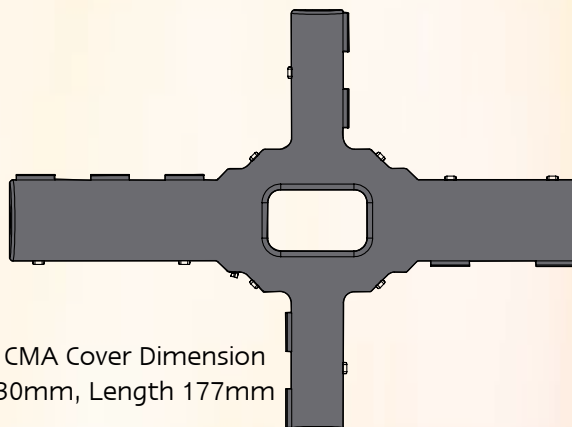

Dual Brake Control or Accessory Splitter

Defined by its blue colour the 7CMB is a splitter from the 7 Core cable that power the brake control or any accessory when brake control is not required, the 7CMB has dual splitters at right angle to the 7 Core cable.

Part No. 7CMB Plug Dimension
Width 60mm, Length 78mm

Part No. CMA Cover Dimension
Width 130mm, Length 177mm

Brake Control or Accessory Splitter

The 7CB plug is a splitter that runs parallel with the 7 Core cable and powers the brake control or any accessory when brake control is not required.

Part No. 7CB Plug Dimension
Width 37mm, Length 78mm

Part No. CMB Cover Dimension
Width 44mm, Length 177mm

2 Core Splitter Plug

The 2P3W is a 3 way plug that splits one cable into two, this allows the fitter to add as many accessories as required, always align the arrows on the plugs to ensure the correct connection.

Part No. 2P3W
To be used when more than one accessory is required.

Part No. 2P3C
Cover for the 2P3W.
Width 35mm Length 126mm

Heavy Duty Truck & Trailer Harness and Lighting System

Reverse Lamp Splitter

Defined by its black colour the 7CR plug is a splitter from the 7 Core cable that power the reverse lamps, work lamps or reverse beeper, the 7CF has a single splitter and runs parallel with the 7 Core cable.

Part No. 7CR Plug Dimension
Width 37mm, Length 78mm

Part No. CMB Cover Dimension
Width 44mm, Length 177mm

2 Core Splitter Plug

The 2P3W is a plug that splits one cable into two, this allows the fitter to add as many reverse function products as required.

Part No. 2P3W
To be used when more than one lamp is required, connect to the black plug of the 7CR series.

Accessory Plug Individual Lamps

Part No. 2PF3
For use when using recessed reverse lamps

Accessory Products

Part No. 2PF200ET
Reverse Beeper.

Part No. 7312BMCS
ECE Approved Reverse Lamp

Part No. 7512BMCS
ECE Approved Reverse Lamp

Combination of splitters when more than one reverse lamp or beeper is required at the rear of the vehicle

Heavy Duty Truck & Trailer Harness and Lighting System

Stop/Tail Lamp Splitter

Defined by its red colour the 7CST plug is a splitter from the 7 Core cable that power the Stop/Tail lamps. It can be used when more than one stop/tail lamp is required at the rear of the vehicle.

Part No. 7CST Plug Dimension
Width 37mm, Length 78mm

Part No. CMB Cover Dimension
Width 44mm, Length 177mm

3 Core Splitter Plug

The 3P3W is a plug that splits one cable into two, this allows the fitter to add as many Stop/Tail lamps as required, always align the arrows on the plugs to ensure the correct connection.

Part No. 3P3W
To be used when more than one stop/tail lamp is required.

Part No. 2P3C
Cover for the 3P3W.
Width 35mm Length 126mm

Stop/Tail Lamp Extension

Part No. 3PFM.2
200mm Cable extension when using more than one stop & tail lamp

Accessory Plug Individual Lamps

Part No. 3PFST
For use when using recessed stop/tail lamps

Combination of splitters when more than one Stop/Tail lamp is required at the rear of the vehicle

Heavy Duty Truck & Trailer Harness and Lighting System

Innovated Marker Cable System

The key to this system is its flexibility by offering every conceivable option for adding any marker from only one outlet buy using a specially designed water proof plug that splits one cable into two.

Flexibility

Cable lengths from 0.25m to 5m combining heavy duty connector covers for every plug and connector assembly point with a breaking strain in excess of 15kg, making this a heavy duty robust marker harness assembly.

DG Rating

Cables and covers are manufactured to comply with DG (Dangerous Goods) Rating. Inspected by worksafe Victoria and is accordance with DG-150424-1, DG-150424-2 in relation to the electrical wiring requirements as it applies to dangerous goods road vehicle bulk tankers, in accordance for usage with petrol and gas tankers. Cabling and lighting complies with AS2809 parts 1 & 2.

Labour Costs

Designed specifically to be easily and quickly installed without the need to cut, splice, solder, join or tape wire joins, reduces fitting times with its simple plug in design allowing skilled or non-skilled fitters to complete the install. Expect to reduce lighting assembly labour costs by up to 75% when using marker lamps fitted with 3M tape.

Warranty

Five Year Warranty for all truck and trailer vehicles and a one year warranty for livestock carrying trailers.

2 Core Marker Cable Specifications

The cable we have chosen for this harness system is used widely in the automotive industry and complies with SA-J1128 Standards, RoHs compliant and DG Rated.

The plugs we have designed are 100% water proof and pass IP68 Standards, our unique double ridged male plugs ensure complete water proofing by doubling the protection from water ingress.

The covers for the plugs have been created for extra strength at the join, engineered to a breaking strain of 15 kg.

These plugs have been designed with a special water proof sealing lip which will not allow water ingress

Cable Width 6mm, Male & Female plug Diameter 9mm, Combined length of plugs when joined 68mm

The cover for the plugs have been created for extra strength and engineered to a breaking strain of 15 kg.

Part No. 2PC, Cable Cover Dimension, Diameter 15mm, Length 72mm

Harness and Lighting System

Main Cable Splitter for Marker Lamp

Cable Lengths with Male and Female Plugs, use when adding 2 core cable lamps

Part No

Cable Lengths with Female Plugs and bare wires, use when adding other brands

Part No

Cable Lengths with Male and Female Plugs, use when adding 3 core cable lamps

Part No

2 Core & 3 Core Splitter Plugs

The 2P3W and the 3P3W is a 3 way plug that splits one cable into two, this allows the fitter to add as many lamps as required, use with the above cable lengths.

2 Core Splitter

Part No. 2P3W

To be used when more than one lamp or accessory is required.

3 Core Splitter

Part No. 3P3W

To be used when more than one stop & tail lamp is required.

Splitter Cover

Part No. 2P3C

Cover for the 2P3W and 3P3W

LED Autolamps Box, Tandem or Boat

Functional, Long Lasting Quality, Value for Money

Innovated Harness System

The key to this system is its ease of fitting. This enables wiring of a trailer to be completed faster which is perfect for trailer manufacturers, DIY or non skilled fitters saving time and money. No cutting, no soldering, no taping and a professional finish.

Flexibility

The system consists of individual cables for box trailers to large tandem trailers with cable lengths up to 8 metres and widths up to 2.1 metres. Boat trailer cables lengths available up to 12 metres in length. All cables have 2 core accessory plug that enable licence and marker lamps to be added if required.

Cable and Plugs

The Cables and plugs are specially designed with tinned copper terminals, special sealing plug ring and have water proof grease added for extra protection. All Cables and Plug sockets are IP67 rated ensuring a water tight fully submersible connection.

- Heavy Duty Water Proof Cable, Plugs and Connectors
- All Lights Compliant with ECE or ADR Road standards
- Cable plugs are IP67 rated, 100% water proof
- Rear lamps, markers and licence lamps are fully submersible
- 5 Year Warranty

Trailer Plug in Harness System

Quality Assured

This system has been on the market in excess of 10 years and continues to remain the popular choice for trailer manufacturers Australia wide. With a 10 year proven track record and a minimal failure rate well under 1%, you can be confident of a long lasting cabling and lighting solution.

Labour Costs

Designed specifically to be easily and quickly installed without the need to cut, splice, solder, join or tape wire joins, reducing fitting times with its simple plug in design allowing skilled or non-skilled workers to complete the install. Expect to reduce lighting assembly labour costs by up to 75%.

Licence Lamps and Connectors

Also available is the LP1 and 35BLM1P that have a 1 metre cable with a plug that fits into the back of the 100, 150 and 275 series lamps. The 99 and 149 have the licence plate lamp inbuilt with the 207 series licence lamps incorporated in its bracket

Warranty

Five Year Warranty when fitted as intended.

- No wiring or crimping tools required
- No cutting or splicing of wires
- No soldering of joins or connections
- No Joiners or taping required
- Professional finish

Cable system for small trailers with a 5 Year Warranty

- 100% waterproof
- Specially designed plugs
- No assembly tools required

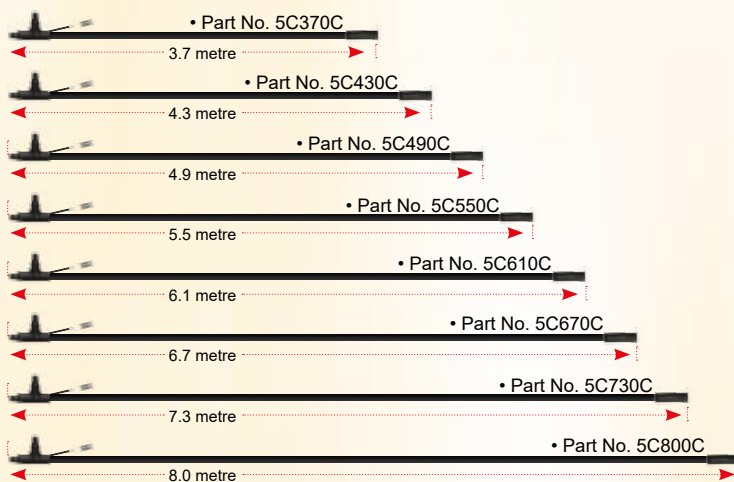

Wiring of a trailer can now be done quickly and easily without cutting, splicing, joining or insulating wires & cables. The cables and plugs are specially designed with tinned copper terminals and water proof grease with IP67 rated plugs and sockets ensuring a water tight connection. All main cables have accessory wires at the ends of the male plugs which are compatible with the marker lamp plug in cable system. Cabling system comprises of the following:

- 1. Gooseneck to lamp** – this cable is fitted from the front of the trailers frame to the rear right hand lamp. The male plug to the lamp has two accessory wires for side markers.
- 2. Lamp to lamp** – this cable is fitted from the right hand lamp to the left hand lamp. The male plug to the lamp has two accessory wires for side markers.
- 3. Cable with trailer plug** – this 1 metre cable is fitted to the gooseneck to lamp cable, or the boat cable connector. This cable ends with a trailer plug. (7 pin flat, 7 pin round or 7 pin small round).
- 4. Marker lamp cable and connector** – For fitting compatible marker lamps to the trailer.
- 5. Licence lamp cable and connector** – LP1 and 35BLM1P have a 1 metre cable with a plug that fits into the back of the 100, 150 and 275 series lamps.

Cable system for boat trailers with a 5 Year Warranty

- 100% waterproof
- Specially designed plugs
- No assembly tools required

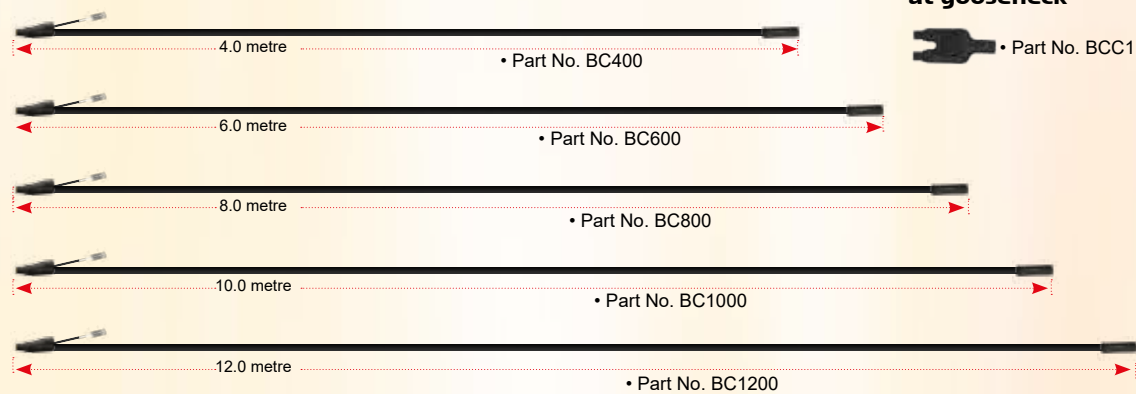

Wiring of a trailer can now be done quickly and easily without cutting, splicing, joining or insulating wires & cables. The cables and plugs are specially designed with tinned copper terminals and water proof grease with IP67 rated plugs and sockets ensuring a water tight connection. All main cables have accessory wires at the ends of the male plugs which are compatible with the marker lamp plug in cable system. Cabling system comprises of the following:

- 1. Boat trailer cable** - this cable connects each Individual lamp to the gooseneck area and plugs into the boat cable joiner. The male plug to the lamp has two accessory wires for side markers.
- 2. Boat cable connector** - this three way connector joins the left and right boat trailer cables to the cable with the trailer plug.
- 3. Cable with trailer plug** - this 1 metre cable is fitted to the gooseneck to lamp cable, or the boat cable connector. This cable ends with a trailer plug. (7 pin flat, 7 pin round or 7 pin small round).
- 4. Marker lamp cable and connector** - For fitting compatible marker lamps to the trailer.
- 5. Licence lamp cable and connector** - LP1 and 35BLM1P have a 1 metre cable with a plug that fits into the back of the 100 and 150 series lamps. The 99 and 149 have the licence plate lamp inbuilt with the 207 series licence lamps incorporated in its bracket.

RE: LED Autolamps HARNESS SYSTEM - ISO 9001:2008 – No. QEC30099

This document is to certify that LED Autolamps Harness System (inclusive of cables, lighting and associated products) comply with the following Standards:

AS 2809.1-2008

Australian Standard

Road Tank Vehicles for Dangerous Goods

Part 1: General requirements for all road tank vehicles

All lighting has either been tested by NATA Accredited Laboratories & certified by Road Vehicle Certification System (RVCS) or has been certified by RVCS pursuant to the ECE certification system, and has been approved by Department of Infrastructure and Regional Development ("Authority"),

For the purposes of AS 2809.1-2008, the following definitions apply:-

1.5.2 ADR Approved, Approval

Approved by, or approval of, the Authority

1.5.3 ADR Authority

The Authority having statutory (legal) control over a particular aspect of a road tank vehicle

AS 2809.1-2008, AS 2809.2-2008

Road Tank Vehicles for Dangerous Goods

Part 2: Road tank vehicles for flammable liquids

2.6 Vehicle Cabling and Electrical Equipment

2.6.1 Application

The requirements of this Clause 2.6 shall apply when the cargo is flammable, or the tanker is to operate in hazardous areas.

Cables must be installed in accordance with the Australian Design Rules for Motor Vehicles and Trailers.

Cabling to the rear of the cabin must have protection complying with Clause 2.6.2.

Cabling to intrinsically safe equipment can be produced by means other than conduit.

2.6.2 Protection of Wiring

Cables outside and to the rear of the cabin shall be protected in accordance with AS/NZS 2053, Parts 1, 2 and 7 or AS D26 (flared fittings), or by an alternative means having at least equivalent effectiveness.

The cables used are a 7 core separately insulated annealed copper wires in compliance with ASTMB3 protected by a factory manufactured 9.5mm polyvinyl chloride casing using plasticisers for cable flexibility, which effectiveness exceeds AS/NZS 2053, Parts 1, 2 and 7 or AS D26 (flared fittings).

2.6.5 Cabling to hazardous areas of Zone 2

The cabling and fittings to the tanker rear of the cabin have weather-proof level of protection rated to IP67 standard. Fully molded sealing glands and sealing gland covers are used.

2.6.6 Cabling to hazardous areas of Zone 1

Cabling shall be suitable, or in conduit suitable, for Zone 1, together with any associated glands and junction boxes.

AS/NZS 2053 Parts 1, 2 and 7 or ASD26 does not apply to this Harness System as the cabling & fittings used are an alternative that exceeds equivalent effectiveness of conduits.

LED Autolamps will indemnify its customers against legal proceedings brought against any customer relating directly to non compliance of the LED Autolamps Harness System with AS 2809.1-2008 Australian Standard for Road Tanker Vehicles for Dangerous Goods.
