6	Fast/Slow Split
7	Sequential Combine
8	Left/Right Split/Single
9	Random 1
10	Random 2

4 Point Fixed Base

Single Bolt/Bracket (LB252ACM only)

PRE-INSTALLATION:

- 1) Carefully unpack and inspect the emergency bar and all mounting accessories before attempting installation. If any parts are found to be damaged or missing please contact your LED Autolamps distributor for advice.
- 2) Plan all cable routing before proceeding with installation. When drilling vehicle surface ensure the area is free from any wires, fuel lines, upholstery, air bags etc. that could be damaged.

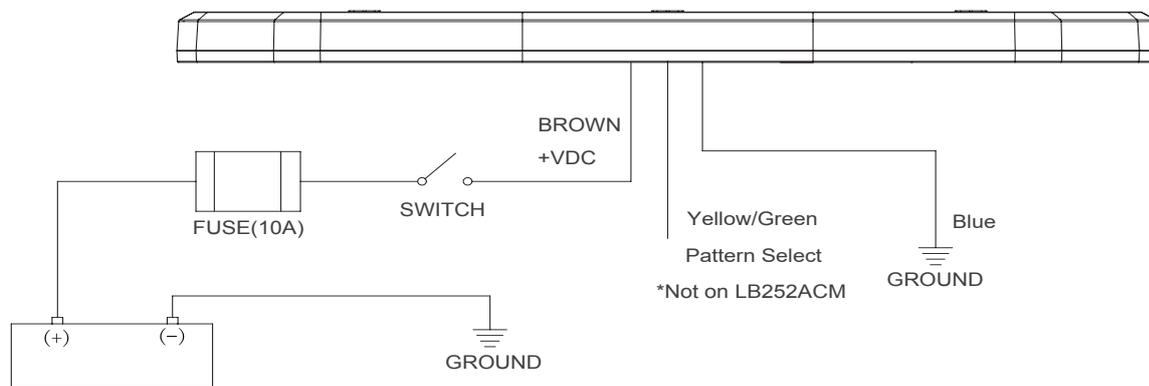

MOUNTING LOCATION:

Ensure the chosen mounting location is a smooth flat area of the vehicle roof. Position the emergency bar centrally to the vehicle's width. When mounting the product ensure it is level from front-to-back and left-to-right. Ensure there are no obstructions limiting visibility to traffic

IMPORTANT! This unit is a safety device and it must be connected to its own separate, fused power point to assure its continued operation should any other electrical accessory fail. Do not wire in parallel with any other accessory. Disconnect the battery before wiring up the minibar, to prevent accidental shorting, arcing and/or electrical shock.

WIRING INSTRUCTIONS: Route wires from the vehicle positive feed to the switch panel in the cab. Use suitable high-temperature vehicle wire if it passes through the engine compartment. Install a suitable in-line fuse as close to the power feed as possible. Ensure emergency bar Black wire is connected to ground source on vehicle. Use cable ties and grommets to secure and protect all cables and wires.

⚠ If in doubt, please consult a qualified automotive electrician.

Next Pattern, Touch Yellow/Green wire to Brown +VDC for 0.5 sec.

Return to Default Pattern #1, Touch Yellow/Green wire to Brown +VDC wire for 2.5 sec.

Conditions with Warranty Against Defects

2 YEAR WARRANTY

This warranty covers faults in components and workmanship of the lamp itself when used under normal conditions and does not cover the following:

- Faulty installation
- Freight charges
- Cost of labour for removal and or replacement (see our website for more information).
- Over-voltage
- Excessive heat damage
- Accidental damage
- Misuse or abuse
- Chemicals that damage plastics as per Chemical Resistance List

Making a Claim: All warranty returns must be tested off the vehicle to ensure that the unit is at fault. This can be done by directly attaching the lamps to a fully charged 12-volt battery. Do not replace any products unless you are 100% sure that the suspected faulty product will be covered under warranty. If the unit is faulty, call your place of purchase so it can be directed to the LED Technologies warranty department or contact the LED Autolamps warranty department direct for full testing, evaluation, and warranty repairs.

If you consider the lamp to be faulty, disconnect the wiring of the lamp, remove nuts from bolts and send to: **LED Autolamps Reply Paid 90350, PO Box 2107 Bundoora VIC 3083**, allow five business days for evaluation. Please ensure returned warranties/credits have a completed Warranty Claim Form, which is found on our website under the "Warranty" Tab.

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.
