5 Year
Warranty

Introducing the EW8001 map light, a versatile lighting solution perfect for endless in-cabin uses. This product serves as both a chart light and a reading light. With its touch sensor switch located on the lamp head, you can easily adjust the brightness to your preference.

A short touch activates the soft-start on/off function, while a long touch enables stepless dimming, allowing you to set the perfect ambiance. The flexible arm design ensures effortless adjustment of the lighting area, providing optimal illumination wherever needed.

For flood lighting, the EW8001 utilises SMD LEDs, ensuring a wide and uniform distribution of light. Additionally, this product offers dual colours in the one unit that allow you to switch between red and white light by pressing down the tactile switch on the rear of the lamp head. Both colours are dimmable, providing flexibility and customisation options for your lighting needs.

- 2.4W/4.5W
- Touch Sensor Switch for Dimming
- Tactile Switch for Colour Transferring
- IP66 Rated
- Voltage Range 10-30 Volt
- Wall Mount
- 5 Year Warranty
