A Clarience Technologies Company

# **CABLE HARNESS & LIGHTING SYSTEM**

Version 5.8 - 2025

# Functional, Long Lasting Quality

## Innovative Harness System

The key to this system is its flexibility, offering every conceivable option for various lighting functions to be added at any point in the truck harness line.

## Flexibility/Versatility

Cable lengths range from 0.25m to 15m combined with heavy duty connector covers for every plug and connector assembly point with a breaking strain exceeding 25kg, making this a heavy duty and robust truck harness assembly.

## Colour Coded

All assembly plugs are colour coded to their specific function. Example - The Brown plug is for Marker Lamps. When requiring a marker lamp, add a brown plug in the harness line. The Yellow (LHS) or Green (RHS) plug is for Side Direction Indicator Lamps. When requiring a Side Direction Indicator lamp, add a yellow or green plug whether left or right hand side in the harness line.

## DG Rating & Road Train

Cables and covers manufactured to comply with DG (Dangerous Goods) Rating. Inspected by Worksafe Victoria and in accordance with DG-150424-1, DG-150424-2 in relation to the electrical wiring requirements as it applies to dangerous goods road vehicle bulk tankers, in accordance for usage with petrol and gas tankers. Cabling and lighting comply with AS2809 parts 1 & 2. You can achieve *Road Train Compatibility to ADR 63/00 on all drawings using the 7 Core (6mm) RTC cable & plugs. See Page 6 & 44-45 for more information.*

## Labour Costs

Designed specifically to be easily and quickly installed without the need to cut, splice, solder, join or tape wire joins, reducing fitting times with its simple plug in design. Expect to reduce lighting assembly labour costs by up to 75%.

## Warranty

Five year warranty for all truck & trailer vehicles and a one year warranty for livestock carrying trailers.

- **Add any Light Anywhere in the Harness System**
- **Easily Replace Damaged Lighting with Minimal Downtime**
- **Heavy Duty Water-resistant Cable, Plugs and Connectors**
- **Colour Coded Plugs to the Colour of the Wire Function**
- **All Large Vehicles and Trailers**
- **All Lights Compliant with ECE or ADR**
- **Cable System Compliant with Dangerous Goods (AS2809)**
- **All Drawings Compatible with Road Train (Page 6 & 44-45)**
- **5 Year Warranty, Livestock Transport 1 Year Warranty**
- **RoHS Compliant Cables, Plugs and Lights**

## Cable and Wire

TWP Cable (Thin wall thermo plastic) and PVC Automotive primary wire complying with SA-J1128, Annealed copper wire in compliance with ASTMB3, RoHS compliant Lead free copper wire with operating temperature between -40°C to +85°C - Harness system tested to B-Double requirements when LEDs are used. Please refer to wire gauge table below for further information regarding wire gauge and amperage.

Function	Wire Colour	Gauge	Rated Amp	Draw @13.8V	Maximum Lamps	Diameter (mm)	Area (mm <sup>2</sup> )	Resistance (Ohms/1000ft)
Earth	White	14	20	-	-	1.62814	2.08	2.525

## Australian First Dual Function Marker/Indicator Lamp

Introducing the All-New 97 series side marker/indicator combination lamp, which is Australian road approved for Category five side direction indicator as well as an amber/red side marker. The lamps are large trailer plugin harness compatible, enabling them to be easily daisy-chained down the length of the vehicle or incorporated into existing harness setup. Adaptability allows you to add any combination of marker lamps or marker/indicator lamps.

**The standard function is an amber/red side marker. The override function is the side direction indicator. When the indicator is active, the marker is disabled. The Front and Rear end outline markers include supplementary indicators which are not ADR.**

## Single Function Lamp Adaptability Or Additional Lamps From Main Cable

Many customers still prefer to use the recessed type rectangle or round lights for their trailer builds. The 7CFS series of plugs allows this to happen by splitting from the main cable a series of individual cables and plugs to suit Stop/Tail Lamps, Indicator Lamps and Reverse Lamps.

PLEASE REFER TO PAGE  
26 AND 27 FOR MORE  
INFORMATION.

Trailer compliance for use in road train is made possible with our range of Road Train Cables. We use a 7 Core (6mm) RTC cable that's Australian made, conforms to applicable standards and is professionally adapted to our cable harness and lighting system. Both options available have a total extended length of 5m, 13m, 14.5, 15.5m and 16m respectively and use high-quality 12V, ISO 1724 and 24V, ISO 1185/DIN 7579 corrosion-resistant aluminium 7 Pin sockets. The standard system also offers 2 Core and 7 Core harness plugs, whilst the Dropdeck cabling is suited to retractable skeletal trailers when combined with a retractable Suzi cable (See page 26/27). It also includes our cable harness and lighting system 7 Core plugs.

Specifications

- 6.0mm Seven Core Cable Black Sheath
- PVC Insulation to AS3191
- Voltage Rating up to 110V
- Strand Diameter: 0.3mm
- Number of Strands: 65
- Conductor Cross Section: 5.22mm<sup>2</sup>
- Wire Colours: Green, Yellow, Blue, Red, White, Black, Brown

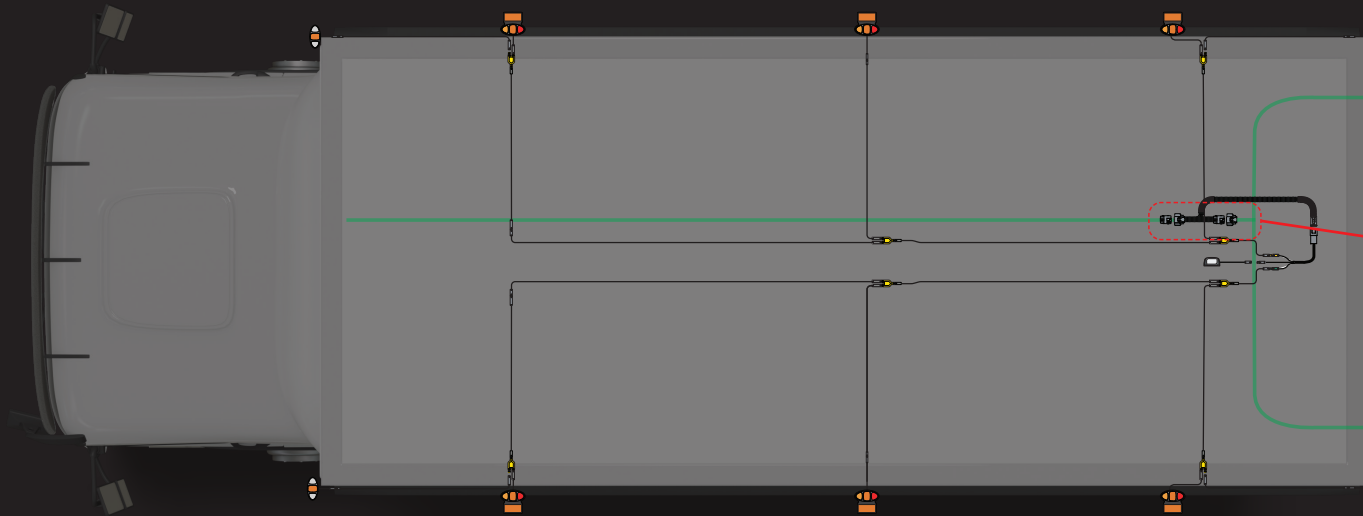

•ROHS •V90 •OXYGEN FREE •LEAD FREE PVC - E.L.V. ONLY

## Power Patch Cables For Vehicle Lighting

The Rigid body trucks can also benefit from this system with many possibilities to advance your lighting and wiring options. We now offer a range of Power Patch Cables that taps into the vehicle's existing rear lighting harness, enabling the addition of markers, high-level combination lamps or trailer sockets without time-consuming wiring. This innovative system will give you the flexibility and adaptability to compliment your O/E fitting requirements saving you time and money.

PATCHING INTO THE  
EXISTING LOOM USING  
A PPATCH POWER HARNESS

**We have break-out patch cables to suit many Rigid Truck Brands.  
If you require a specific application, please call us to discuss  
your requirements.**

**Detailed Explanation in Our  
Patch Harness Catalogue on  
page 38-61**

7 Core Cables with Male & Female Plugs

The cable we have chosen for this harness system is used widely in the automotive industry and complies with SA-J1128 Standards. The cable width is 9.5mm, Male & Female plug diameter is 18mm. The plugs we have designed are 100% water-resistant, with a unique double sealing lip that will not allow water ingress. The covers for the plugs have been created for extra strength and engineered to a breaking strain of 25kg. The connection cover ensures a secure fitment and completes Dangerous Goods Rating AS2809.

Part No.	Length

7CMF8B	8 METRE
7CMF10B	10 METRE
7CMF15B	15 METRE

2 Core Cables with Male & Female Plugs or Female Plugs with Bare Wires

The cable we have chosen for this harness system is used widely in the automotive industry and complies with SA-J1128 Standards. The cable width is 6mm, Male & Female plug diameter is 9mm. The plugs we have designed are 100% water-resistant, with a sealing lip that will not allow water ingress. The covers for the plugs have been created for extra strength and engineered to a breaking strain of 15kg. The connection cover ensures a secure fitment and completes Dangerous Goods Rating AS2809.

## 7 Core Cables with Male Plug and Bare Wires

The cable we have chosen for this harness system is used widely in the automotive industry and complies with SA-J1128 Standards. The cable width is 9.5mm, Male plug diameter is 18mm. The plugs we have designed are 100% water-resistant, with a unique double sealing lip that will not allow water ingress. The covers for the plugs have been created for extra strength and engineered to a breaking strain of 25kg. The connection cover ensures a secure fitment and completes Dangerous Goods Rating AS2809.

Part No.	Length
7CM1B	1 METRE
7CM2B	2 METRE
7CM3B	3 METRE

## 3 Core Cables with Male & Female Plugs

The cable we have chosen for this harness system is used widely in the automotive industry and complies with SA-J1128 Standards. The plugs we have designed are 100% water-resistant, with a sealing lip that will not allow water ingress.

Part No.	Length
3PMF.2B	20 CENTIMETRES
3PMF.5B	50 CENTIMETRES
3PMF1B	1 METRE
3PMF1.5B	1.5 METRE
3PMF2B	2 METRE
3PMF3B	3 METRE
3PMF4B	4 METRE
3PMF5B	5 METRE

## 16 Gauge Cables for the Accessory Blue Wire

The heavy-duty truck harness system has provisions for an accessory product fitted via the 16 gauge blue wire. Plugin one of the adapter plugs into the harness system, then run a 2 Core cable to connect an accessory product.

Part No.	Length
2PF100/16G	1 METRE
2PF200/16G	2 METRE
2PF300/16G	3 METRE
2PF400/16G	4 METRE
2PF500/16G	5 METRE

**Important Note;** Work lights on the harness system are an accessory and should be connected to the blue wire and not the reverse (black) wire. The maximum size work lamps allowable on the blue wire are 120 watts in a 12 volt system and 240 watts in a 24 volt system. If you need to run work lamps at the same time as the reverse light then the blue wire can be connected to the reverse wire at the front of the trailer.

## 7 Core Cables Plug to DT Connector

NEW

Introducing our new 7 Core Cables with 7PF Large Harness System Plug and DT6S Deutsch Plug—engineered for durability and versatility. These water-resistant cables are fully compatible with the Large Harness Systems and adapt Deutsch connectors seamlessly. Available in 2 lengths ranging from 25cm and 1 metre with left and right hand sides, they offer flexible solutions for a wide range of applications. Built tough for performance, these cables are ready to power your next project.

Part No.	Description	Length
7PFCSB-DT6SL.25	LEFT TAIL, 7PF PLUG TO DT6S, 0.25M	25 CENTIMETRES
7PFCSB-DT6SL1	LEFT TAIL, 7PF PLUG TO DT6S, 1.0M	1 METRE

## 2 Core Cables with 2PF to DT2S Plugs

NEW

Introducing our new 2 Core Cables with 2PF Large Harness System Plug and DT2S Deutsch Plug—engineered for durability and versatility. These water-resistant cables are fully compatible with the Large Harness Systems and adapt Deutsch connectors seamlessly. Available in 11 lengths ranging from 25cm to 5 metres, they offer flexible solutions for a wide range of applications. Built tough for performance, these cables are ready to power your next project.

Part No.	Description	Length
2PFCSB-DT2S.25	2PF PLUG TO DT2S, 0.25M	25 CENTIMETRES
2PFCSB-DT2S.5	2PF PLUG TO DT2S, 0.5M	50 CENTIMETRES
2PFCSB-DT2S1	2PF PLUG TO DT2S, 1.0M	1 METRE
2PFCSB-DT2S1.5	2PF PLUG TO DT2S, 1.5M	1.5 METRE
2PFCSB-DT2S2	2PF PLUG TO DT2S, 2.0M	2 METRE
2PFCSB-DT2S2.5	2PF PLUG TO DT2S, 2.5M	2.5 METRE
2PFCSB-DT2S3	2PF PLUG TO DT2S, 3.0M	3 METRE
2PFCSB-DT2S3.5	2PF PLUG TO DT2S, 3.5M	3.5 METRE
2PFCSB-DT2S4	2PF PLUG TO DT2S, 4.0M	4 METRE
2PFCSB-DT2S4.5	2PF PLUG TO DT2S, 4.5M	4.5 METRE
2PFCSB-DT2S5	2PF PLUG TO DT2S, 5.0M	5 METRE

## 2 Core Cables with 2PF to DT2S Plugs

Our compatible range of lighting products is designed to seamlessly integrate with our durable 2, 3, and 7 core cables that terminate with DT Deutsch connectors plugs. These water-resistant cables support reliable power delivery and compatibility with Large Harness Systems, ensuring dependable performance across various lighting applications and installation environments.

## Reverse Accessory Products

**Important Note;** When Reverse lamps are run as an accessory in the reverse system then the maximum power allowable is 60 watts in a 12 volt system or 120 watts in a 24 volt system. It is recommended the work lamps when used as a reverse light should be run from the blue wire/splitters, see page 25. The following table should be followed if Reverse Lamps are already used in the system and more are to be added.

### Additional Reverse Lamps Max Combined Output in Watts

No. Of Reverse Lamps	12 Volt System	24 Volt System
2	46 Watts	92 Watts
4	36 Watts	72 Watts
6	24 Watts	48 Watts

## 7 Core Main Plugs and Covers

The 7CJB rear junction splitters are designed to split the 7 Core cable into a left and right side for rear lighting functions of Stop/Tail, Indicator and Reverse. The 7CJB also has left and right side 2 pin plugs to connect licence plate and marker lamps. The 7P3WB is a 7 Core cable splitter which gives you the ability to add another rear combination lamp and continue the harness cable before terminating with a final rear combination lamp assembly. The covers available for the plugs have been created for extra strength and engineered to a breaking strain of 25 kg. The connection cover is for secure fitment and completes Dangerous Goods Rating AS2809.

**Part No. Size**

**Part No. Size**  
7PCB | 193MM x 50MM

## 7 Core Junction Splitter and Cover

The 7CJEB 7 Core Rear Junction Splitter Extension is used with the 7CJB, above to connect a 7 pin trailer base at the rear of the trailer. Its purpose is to connect another trailer to the existing harness system when using the 7CFTB rear trailer plug.

**Part No. Size**  
CMEB | 188MM x 178MM

**Part No. Size**

## Marker Lamp Splitters

Defined by its brown colour, the Marker lamp splitters split from the 7 Core cable and power the marker lamps. The 7CMFB has dual splitters at a right angle to the 7 Core cable. The 7CFFB also has dual splitters but runs parallel to the 7 Core cable. The 7CFB is a single splitter that runs parallel to the 7 Core cable. The covers for the plugs have been created for extra strength and engineered to a breaking strain of 25kg. The connection cover is for secure fitment and completes Dangerous Goods Rating AS2809.

## 2 Core Splitters

The 2 Core splitter are used to split the 2 Core cable and powers Marker Lamps, Indicator (2 Core) lamps, Reverse lamps and Accessories. The plugs we have designed are 100% water-resistant, with a sealing lip that will not allow water ingress. The cover for the plugs have been created for extra strength and engineered to a breaking strain of 15kg. The connection covers ensures a secure fitment and completes Dangerous Goods Rating AS2809.

## Indicator Lamp Splitters

Defined by its Yellow colour, the Indicator lamp splitters split from the 7 Core cable and power both the left and right-hand side indicator lamps. The 7CMIB has dual splitters at a right angle to the 7 Core cable. The 7CIRLB also has dual splitters but runs parallel to the 7 Core cable. The 7CILB and the 7CIRB are single splitters parallel with the 7 Core cable used for left-hand and right-hand indicators and defined by their colours Yellow for left and Green for right. The covers for the plugs have been created for extra strength and engineered to a breaking strain of 25kg. The connection cover is for secure fitment and completes Dangerous Goods Rating AS2809.

## Dual Function Marker/Indicator Splitters

Defined by its Yellow colour, the Dual function Marker/Indicator lamp splitter split from the 7 Core cable and power both the left and right-hand side Indicator/Marker lamps. The 7CILR3B has dual splitters at a right angle to the 7 Core cable. The 3P3IMB is a plug that splits one cable into two, and this allows the fitter to add as many combination Indicator/Marker lamps as required. All connectors have covers available for secure fitment of the cables ensuring Dangerous Goods Rating AS2809.

# Reverse Lamp Splitters

Defined by its black colour, the Reverse lamp splitters split from the 7 Core cable and power the reverse lamps and reverse beeper. The 7CRRB has dual splitters that run parallel to the 7 Core cable. The 7CRB is a single splitter that runs parallel to the 7 Core cable. The 2P3WB is a plug that splits one cable into two, allowing the fitter to add additional Reverse lamps. The cover for the plugs, created are engineered for extra strength to a breaking strain of 15kg for 2 Core and 25kg for 7 Core. The connection cover is for secure fitment and completes Dangerous Goods Rating AS2809.

# Separate Stop/Tail Lamp Compatible with 3 Core Stop/Tail Plugs and Cables

The heavy-duty truck harness system has provisions for a separate stop/tail lamp. Plug in the stop/tail adapter, plug 7CSTB into the harness system, then run a 3 Core (3PMF) cable to connect a stop/tail lamp. If you require a second stop/tail lamp, then add the 3 Core splitter 3P3WB for an extra cable to connect the lamp. All connectors have covers available, ensuring Dangerous Goods Rating AS2809 and secure fitment with a breaking strain of 15kg for the cables.

## Brake Control or Accessory Splitter

Defined by its blue colour the 7CMBB has dual splitters at right angle to the 7 Core cable. The 7CBBB has dual splitters that run parallel with the 7 Core cable. The 7CBB plug is a single splitter that runs parallel with the 7 Core cable. These splitters power the brake control or any accessory when brake control is not required. The covers for the plugs have been created for extra strength and engineered to a breaking strain of 25kg. The connection cover is for secure fitment and completes Dangerous Goods Rating AS2809.

## Main Cable 7 Core Splitters

All assembly plugs are colour coded to its specific function. Example - The Brown plug is for Marker Lamps. When requiring a marker lamp, add a brown plug in the harness line. The Yellow (LHS) or Green (RHS) plug is for Side Direction Indicator Lamps. When requiring a Side Direction Indicator lamp, add a yellow or green plug whether left or right hand side in the harness line.

# Standard/Heavy Duty Sockets, Plugs and Suzi Coils

These 7 pin connectors and Suzi coils are for electrical connection between a vehicle and a trailer. Both voltages available, 12V - ISO 1724 and 24V - ISO 1185/DIN 72579. The plugs and connectors either use corrosion-resistant aluminium or plastic materials with Nickel-plated Brass contacts.

## ABS/EBS Sockets, Plugs and Suzi Coils

These connectors are specific for the ABS/EBS braking system between a truck, trailer or semitrailer, both for 12V and 24V systems. The ABS/EBS plugs, connectors conform to ISO/DIN 7638, and the materials used conform to ADR/GGVs norm requirements for vehicles transporting hazardous goods. The plugs are connected to the sockets with a steel bracket to avoid accidental disconnection. Mechanical resistance and water tightness guarantee an efficient and reliable electrical connection.

## Road Train Adaptability to ADR 63/00 Vehicle Standards

Trailer compliance for use in road train is made possible with our range of Road Train Cables. We use a 7 Core (6mm) RTC cable that's Australian made, conforms to applicable standards and is professionally adapted to our cable harness and lighting system. Both options available have a total extended length of 5m, 13m, 14.5, 15.5m and 16m respectively and use high-quality 12V, ISO 1724 and 24V, ISO 1185/DIN 7579 corrosion-resistant aluminium 7 Pin sockets. The standard system also offers 2 Core and 7 Core harness plugs, whilst the Dropdeck cabling is suited to retractable skeletal trailers when combined with a retractable Suzi cable (See page 26/27). It also includes our cable harness and lighting system 7 Core plugs.
